At Hacienda Villarta, some places are recognized since time immemorial for the high quality of its fruits. The base grapes of this wine come from one of them. The farm is located near the ancient Roman settlement of Escalonia and Alberche riverside.

Next to their vineyards stands a modern winery with large production premises where stainless steel vats of 500 hl are located together with filtration, decanting and temperature control equipments.

Its spectacular aging cellar, unique in Spain with perched barrels on an ornate structure, is underground and contains about 4,000 barrels of American and French oak deployed in seven heights.

All the environment is a magnificent setting for wine.
